

Systematic RS Global Macro

STRATEGY DESCRIPTION /

The Dorsey Wright Systematic RS Global Macro strategy provides broad diversification across markets, sectors, styles, long and inverse domestic and international equities, fixed income, currencies, and commodities using Exchange Traded Fund (ETF) instruments.

The strategy holds approximately ten ETFs that demonstrate, in our opinion, favorable relative strength characteristics. The strategy is constructed pursuant to Dorsey Wright's proprietary basket ranking and rotation methodology.

This strategy is well positioned from an investment opportunity perspective because it is not limited to a specific market. This allows for the efficient allocation of risk capital globally to opportunities where we believe potential returns are particularly compelling.

Historical Performance

Dorsey, Wright Systematic Relative Strength Global Macro Strategy

The performance represented in this brochure is based on the composite monthly performance of actual portfolios following the Systematic Relative Strength Global Macro Strategy during the period displayed. Net performance shown is total return net of management fees, commissions, and expenses for all Dorsey Wright managed accounts, managed for each complete month for each objective, regardless of levels of fixed income and cash in each account. Return calculations are time-weighted returns and include cash flows. The U.S. Dollar is the currency used to express performance. DWA's fees are described in our form ADV Part 2A. The advisory fees of the strategies' primary advisors are described in Part 2A of the adviser's Form ADV. The starting values on 3/31/2009 are assigned an arbitrary value of 100 and statement portfolios are revalued on a trade date basis on the last day of each quarter. All returns since inception of are compared against the Dow Jones Moderate Portfolio Index. The volatility of the Model and of actual Accounts can be different than the volatility of the Dow Jones Moderate Portfolio Index. The Dow Jones Moderate Portfolio Index is a global asset allocation benchmark. 60% of the benchmark is represented equally with nine Dow Jones equity indexes. 40% of the benchmark is represented with five Bloomberg fixed income indexes. The S&P 500 is a stock market index based on the market capitalizations of 500 leading companies publicly traded in the U.S. stock market, as defined by Standard & Poor's. The Bloomberg Aggregate Bond Index is a broad base index, maintained by Bloomberg, and is used to represent investment grade bonds being traded in the United States. The NASDAQ Global ex US Total Return Index is a stock market index that is designed to measure the equity market performance of markets outside of the United States and is maintained by Nasdaq. The Dow Jones U.S. Real Estate Index invests in U.S. real estate stocks and real estate investment trusts (REITs). The S&P GSCI Commodity Index is a production weighted commodity index comprised of 24 commodities from all commodity sectors. A list of all holdings over the past 12 months is available upon request.
